

REMARKS

The present Amendment is submitted under 37 CFR 1.312 after issuance of the Notice of Allowance dated July 14, 2005. The present Amendment was not submitted earlier since the necessity of the amendments was not noticed earlier.

The present Amendment serves to ensure proper disclosure and protection of the invention. Entry of the present Amendment will not require any substantial amount of work on the part of PTO personnel. Therefore, entry of the present Amendment is respectfully presented.

The above amendments to the specification are presented in order to correct a typographical error made in the translation of the application into English. In particular, the term "fieldd" was repeated throughout the specification. However, the term "fieldd" should be "read." Accordingly, in order to ensure proper disclosure and protection for the present invention, each instance of the term "fieldd" in the substitute specification has been replaced with the term "read."

The amendments to the specification are non-substantive in nature and do not add new matter.

Accordingly, it is respectfully requested that the present Amendment be entered as being directed to matters of form not affecting the scope of the invention.

Respectfully submitted,

Toyaji GUSHIMA et al.
